

MAKING HOMEMADE SNOW

A **GETWISE**  STEAM Activity Sheet

Name: _____

Date: _____

OBJECTIVE: Create “snow” and observe its properties.

MATERIALS:

- Baking soda
- Shaving cream
- Mixing bowl
- Spoon
- Small cup of water
- Paper towels

PROCEDURE:

1. Add 1 cup of baking soda to the bowl.
2. Slowly add shaving cream, mixing until it feels like snow.
3. Try forming a snowball. Add a few drops of water to see what happens.
4. Observe texture, temperature, and appearance.

DATA/QUESTIONS:

How does homemade snow feel compared to real snow?

Does adding water change it?

Can you stack or shape it?
